

## **Task 3**

### **Technology Details:**

- Framework: Selenium, TestNG, Appium
- Language: Java
- Build tool: Gradle
- Reporting Tool: Allure
- Design: POM and Singleton Class pattern

### **Reason for choosing the tech stack:**

- Page Object Model has been followed for automating the android app
- Whole automation project is maintained with a single android driver and it is ensured by making the **AppLaunch** class as Singleton
- For better reporting view, I have added allure framework which will give a web view
- I have added screenshot also for each test case, if needed

### **Proposed Test Case:**

- I have provided test case for monefy App in folder, Task 1
